

# Star Light

Ev-'ry night I look up and I see the brightest star. Then I make a wish as dreamers often do.

I hope that with the morning light, when I open my eyes, I will find that all my wishes have come true.

(PART I) Star light in the night, brightest star that I see. Star light, oh star so bright, won't you please grant this one wish for me?

(PART II - @ same time as PART I) Oh, star light, in the darkest night, brightest star that I see. Oh, star light, oh star so bright, won't you please grant this one wish for me?

Won't you please grant this one wish for me?
